

## **You got into Internet Marketing to create lifestyle right?**

### **How you can play with the big boys, automatically.**

#### **You know that no matter what the product, service or course is:**

Pay Per Click, Search Engine Optimization, Video Marketing, Pay Per View, Social Marketing, Product Creation, Affiliate Marketing, Persuasion Marketing, Webinars, Teleseminars, Membership Sites, Auto Blogging, Keyword Research, PLR Content, Software Creation, Autoresponders, List Building, Mobile Marketing, Traffic Generation, Conversion Tools, Adwords, Facebook Marketing, Link Building, Mini Sites, Social Bookmarking, Product Launching, Outsourcing, Continuity Programs, Local Search Marketing, Copywriting, Blogging, Link Farms, Media Buying, Twitter Tools, Licensing, Content Creation, Seminars, Squeeze Pages, WordPress Plugins, Coupon Marketing, CPA Marketing, Niche Marketing, Lead Generation, Viral Marketing, Bum Marketing, Scraping Content, Black/Grey/White Hat Marketing, Recruiting Affiliates, Upselling/Downselling, Newsletter Marketing, Cookie Stuffing, Competition Spying, PR Marketing, Domaining, Site Flipping, Web 2.0, Niche Research, etc. etc.

How do the owners and JV partners launch and continue to promote them?

You don't see people with a PPC course, launch using PPC.

You don't see people with a CPA course, launch using CPA.

You don't see people with an SEO course being launched with PPC, CPA or SEO.

**They launch and continue to market by mailing their list and getting their JV partners to mail their lists as well.**

It's all about having a list to work with.

It always has been and will be.

## **As an Internet Marketer, you have too many things to deal with:**

Testing, Tracking, Server Maintenance, Site Maintenance, Article Writing, Site Content, Niche Research, Audio Creation/Editing, Video Creation/Editing, Free Reports, Graphics, Blog Posting, Budgeting, Keyword Research, Upsells, Cross-sells, Newsletter Writing, Autoresponder Content, Analyzing Your Market, Segmenting, Copywriting, PPC Campaigns, Recruit Affiliates, Customer Relationships, Legal and Compliance, Manage other Sites, Find JV Partners, Fulfillment, Acquiring Testimonials, Link Building, Handle Sales/Refunds, Product Creation, Search Engine Optimization, Site Design, Handling Merchant Account, Figure What to do Next, etc.

**You and I both know that overwhelming feeling, and to make things worse, you don't have the time to do them all.**

**So how do you do the most important thing, build a list, with so much stressing you out already?**

You do what the "big boys" do; you get JV partners to help build your list while you focus your time and effort in the other areas of your Internet Business that we talked about.

Ok, so like me you don't have time to go and find JV partners, contact them, wait forever for them to reply (if they ever do) and then to finally be rejected because they are "too good" for you or whatever lame reason they give you.

**You got into Internet Marketing to create a lifestyle, right? I did!**

**It's a great feeling when your friends take you seriously and stop giving you that crazy look when you talk about traveling, cars, and being in control of your destiny.**

**It feels great when your family asks you to explain what you are doing, when they used to laugh at you for talking about your dreams and "what you're gonna do."**

That's what happened to me, so here's what I did:

I created a Co-Op system where Co-Op members build their list by helping other Co-Op members build their list at the same time.

The system handles list building for you and all you need is a site/blog that is Internet Marketing related.

**What you need to do next:**

Join the others Co-Op members at [ListCrew.com](http://ListCrew.com) and put your list building on autopilot.

## Troy McDonald

<http://www.ListCrew.com>

P.S. Here is what users are saying:

I am making this post to let you know about my experience with Troy's program so far...I signed up for the free account on his site a couple of days ago - quite a bit skeptical at first. However, I'm always looking for ways to build my IM list, especially for free :)

It literally took me all of 10 minutes to sign up and get everything working right on my website, so that was really cool. And to top it off, I've already had 13 opt ins the last 2 days!

I know that's not massive list building, but for a brand new list and offer I'm really happy about it. I've used other viral list builders in the past without any instant results. I also know with these methods that the longer you do them, the growth in subscribers comes exponentially.

I highly recommend that you get an account!!!

**Jason Hornung**

I can say ListCrew works great, on auto pilot.

It used to be when I logged into my autoresponder account, I was checking to see IF anyone had subscribed. Now, when I log in, I'm checking to see How Many subscribers have joined the family.

It is a cooperative of members. So from the beginning you have a network of people promoting your opt-in for you. It's kind of cool being a member of an organization where every single member actually benefits from it.

It works on complete auto-pilot. It requires no maintenance on your part. Unless you want to amend the campaign somehow, you can just sit back and let it "do its thing".

It's hard to think of a reason why you would not utilize this service to (at least) augment your other list building efforts.

**David Maddux**

I have to say, this has proven to be one of the simplest ways I have found to add subscribers to my list. The setup was so easy, I was done in less than 15 minutes.

I started out immediately getting subscribers, a steady 2 to 4 each day. Now I am up to over 5 per day. And, if you think that doesn't sound like a lot, just multiply that by 30 days for a month - that's 150 subscribers a month - nearly 2000 per year! AND ALL FOR FREE.

Thank you Troy, ListCrew is definitely a winner in my book!
